SCHOOL OF DESIGN

“The Art of Innovation: Pushing Boundaries in Design”

Date of Lecture: 25th September 2021

Venue: School of Design

Speaker: Ms. Mansi Salunkhe

On 25th September 2021, the School of Design had the honor of hosting an inspiring guest lecture titled **“The Art of Innovation: Pushing Boundaries in Design”** by **Ms. Mansi Salunkhe**, a celebrated designer known for her innovative and boundary-pushing approaches to design. The lecture focused on how designers can break traditional limits, challenge norms, and create impactful, forward-thinking designs. The primary objective of the lecture was to encourage students to think beyond conventional boundaries and adopt an innovative mindset in their design processes. Ms. Salunkhe shared her experiences and insights on how to approach design as an evolving practice, pushing creative limits and embracing the intersection of technology, sustainability, and human-centered design.

Throughout the lecture, students were encouraged to ask questions and engage in discussions about the challenges they face as emerging designers in an ever-evolving industry. Ms. Salunkhe responded with thoughtful advice on how to stay inspired, manage creative blocks, and approach failure as part of the innovation process.

Many students were particularly inspired by her approach to balancing aesthetics with functionality, as well as her emphasis on sustainability. Several students also inquired about how to build a career that combines creative innovation with ethical design, to which Ms. Salunkhe offered practical guidance and encouragement.

Ms. Mansi Salunkhe’s guest lecture on **“The Art of Innovation: Pushing Boundaries in Design”** was an enriching and thought-provoking session that encouraged students to adopt an open, experimental approach to their design practices. The lecture reinforced the idea that innovation in design goes hand-in-hand with creativity, sustainability, and technology, all while staying grounded in real-world applications.

Students left the session motivated to push the boundaries of their own design work and to think boldly in their pursuit of innovation. The lecture was an excellent reminder that as designers, they have the power to shape the future and create meaningful change in the world.
