

One Week Summer Training and Internship Program on Artificial Intelligence and Data Science using Python

Organised by SUN in collaboration with IT professional community & Computer society of India.

About Internship Program :

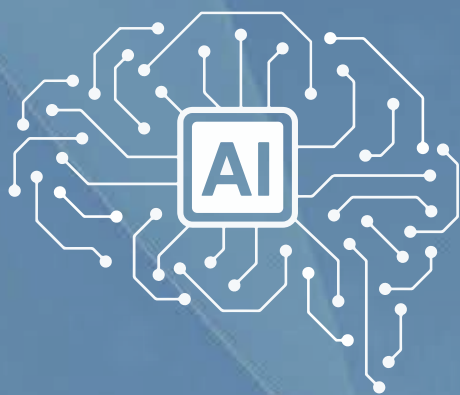

- This internship program is especially design to provide in depth technical exposure to the latest trends & technologies in IT industry.
- The modular approach will provide the participants with a comprehensive treatment of the theory behind the practical implementation.
- This internship also features extensive supervised projects for participants to gain direct hands-on experience in technology implementation.
- This internship program includes introduction to Artificial intelligence & Data science along with TA supervised coding sessions for all the participants.
- Experience our unique Project-based hands-on learning approach for leadership in Artificial intelligence & Data science using python.

SANDIP
UNIVERSITY

How does this program benefit you ?

- Learn & understand the best practices of Artificial intelligence & Data science using python direct from IT industry professionals.
- Diploma/UG/ PG students: Learn the latest programming techniques in Artificial intelligence & Data science using python with practical knowledge for projects/ application development and also gain an edge in placements.
- Learn & understand the best practices of Artificial intelligence.
