Mb No. 8055665077

6. Event Outline, Objective & Outcome of the event:

School of Computer Science and Applications, Sandip University had organized an Industrial Visit on 25th January, 2018 for twenty students of second year BCA, BSc Computer and MCA who were accompanied with three faculties of the department. The visit was organized with prior permission to National PARAM Supercomputing Facility Center, CDAC Pune. The National Supercomputing Facility (NPSF) is a result of more than two and half decade effort of research and development in High Performance Computing (HPC) since C-DAC's inception

Students got the opportunity to see and understand the working of PARAM Yuva II Supercomputer. This trip was highly useful for the students in terms of practical knowledge about parallel and High Performance Computing

Output of Program: The students got benefited in terms of the technical details provided by the company on an important features and structure of PARAM Supercomputer series.

7. Event photos which must include photos of Inauguration, felicitation, event conduction and valedictory ceremony. (If applicable)
