**Workshop**

**On**

**“Data Analysis Using Tableau”**

**Report**

1. **Event Title:** Workshop on “Data Analysis Using Tableau”
2. **Event Date:** *06 Dec 2022*
3. **Event Venue:** Digital Classroom, SOCMS
4. **Name of Event Coordinator:** Dr. Ajit Kumar

**Event Description:**

A complete data analytics tool called Tableau enables you to prepare, analyse, work together, and share your big data findings. Tableau excels at self-service visual analysis, enabling users to explore governed big data and quickly share their findings with others in the company. A new category of AI-powered analytics called Tableau business science gives business domain specialists access to data science capabilities. Data scientists have mostly been responsible for using AI, machine learning, and other statistical techniques to tackle business challenges.

This workshop was organized for **NewAge MBA** students. The resource person was **Dr. Vipul Patel** from School of Petroleum Management, Pandit Dindayal Eney University, Gandhi Nagar.
