Computer Science & Application

Brief description of Event:

The Department of Computer Science & Application, School of Computer Sciences & Engineering, Sandip University is organizing an Industrial Visit to Sahyadri Farmers Producer Company Ltd. (Sahyadri Farms) located in Mohadi, Dindori, Nashik. The visit aims to provide students with practical exposure to the agricultural industry and the working of a leading farmers' cooperative. Students will gain insights into modern farming techniques, supply chain management, and the role of technology in agriculture.

The program includes a guided tour of the facilities, interaction with company representatives, and understanding the business processes involved in the farm's

operations. This hands-on experience will help students appreciate the real-world applications of their academic learning in the agriculture sector and inspire innovative thinking.

Objective of the Event:

The Industrial Visit is organized to bridge the gap between theoretical knowledge and practical application by exposing students to the agribusiness sector. It aims to help students understand the operational aspects of a farmer producer company, encourage interaction with industry professionals, and foster an appreciation for technology integration in agriculture.

Outcome of the Event:

The Industrial Visit will provide students with valuable insights and firsthand knowledge of agricultural practices and business operations. It is expected to enhance their understanding of industry challenges and innovations, motivating them to explore career opportunities in agriculture and allied sectors. The visit will also strengthen the department's relationship with industry partners, encouraging future collaboration and support.
