<b>Total Number of Participants</b>	: 48 Participants
<b>Resource Person</b>	: Sneha Madalaik, “Winjit” Technology

As part of their academic curriculum, FY–MCA, Sem – I, students visited Winjit Technologies to gain practical exposure to the software industry. During the activity, students were introduced to the company’s innovative solutions in AI, IoT, Blockchain, and enterprise software, along with insights into project management and the software development lifecycle. The interactive sessions with industry professionals allowed students to understand real-world challenges, corporate culture, and client-oriented approaches, thereby complementing their classroom learning with valuable industry experience.

The industry visits to Winjit Technologies proved to be an enriching experience for FY–MCA- SEM I students, offering valuable insights into real-world software development practices, innovative technologies like AI, IoT, and Blockchain, and the professional culture of a leading IT company. The visit effectively bridged the gap between theory and practice, enhanced students’ understanding of the software development lifecycle, and motivated them to think innovatively while developing problem-solving and professional skills aligned with industry expectations.

: Dr.Deepali Chaudhary, Assistant Professor, SOCSE, Sandip University, Nashik  
: Mritunjay Kr. Ranjan, Assistant Professor, SOCSE, Sandip University, Nashik
