The School of Computer Sciences and Engineering, Sandip University, Nashik, successfully organized a Training Session on “Research Gap Analysis and Literature Survey” to enhance the research skills of faculty members and students.

The session focused on literature survey techniques, identification of research gaps, analysis of existing research work, and formulation of research problems. The expert shared practical insights, examples, and guidance on reviewing research papers and identifying potential areas for future research. The interactive session encouraged active participation and discussion among the attendees.

Conclusion & Remarks

The session concluded on an informative and positive note. It enhanced participants’ understanding of systematic literature review and research gap identification. The programme concluded with a vote of thanks, expressing gratitude to the expert, organizers, faculty members, and students for their valuable contribution and participation.
