The Department of Computer Science & Application, School of Computer Sciences & Engineering, Sandip University organized a Workshop on Bootstrap for Web Design on 27th February 2026 for BCA and BSc CS AIML VR Computer Science Semester students. The workshop was conducted by Dr. Vaibhav Sonaje, Associate Dean, CSA, SOCSE, Sandip University. During the session, he explained the fundamentals of Bootstrap, responsive web design, grid system, layout structure, components, forms, navigation bars, buttons, cards, and styling techniques.

The session included practical demonstrations to help students understand how to design mobile-friendly and professional websites efficiently using the Bootstrap framework. The workshop was successfully coordinated by Sejal Lahare, Dr. Deepali Chaudhary, and Gaurav Durgude. A total of 92 students actively participated in the workshop. The session was purely knowledge-oriented without any quiz or competition, focusing on concept clarity and hands-on learning. All the students enthusiastically participated and benefited from the practical exposure to modern web design techniques. Bootstrap is one of the most widely used front-end frameworks in today's web development industry, and the workshop enhanced students' skills in responsive website development aligned with current industry trends.
