Organizing Committee: Department of Computer Science and Engineering and AIML.

Brief description of Event:

The Expert Lecture on Intellectual Property Rights (IPR) was organized to create awareness among students about the importance of protecting intellectual property, including patents, copyrights, trademarks, and industrial designs. The session highlighted the process of intellectual property registration, its role in innovation and research, and the significance of IPR in academic and professional development. The lecture encouraged students to understand and respect intellectual property rights and apply this knowledge in their academic projects and future research activities.

Objective of the Event:

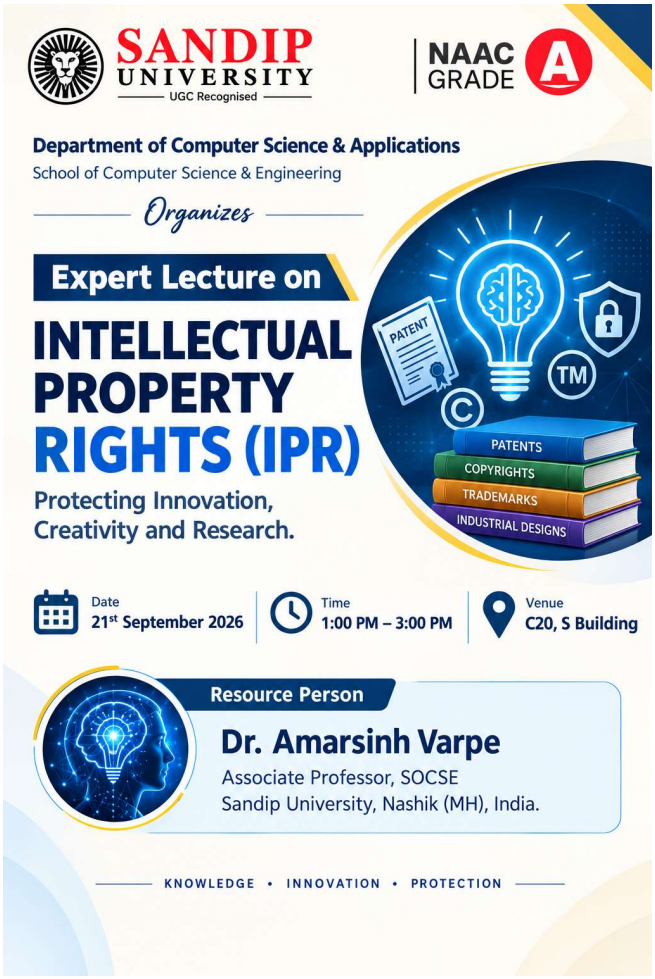

The objective of the Expert Lecture on Intellectual Property Rights (IPR) was to create awareness among students about the importance of intellectual property protection, including patents, copyrights, trademarks, and industrial designs. The event aimed to enhance students' understanding of IPR registration procedures, encourage innovation and

research, and promote the ethical use and protection of intellectual property in academic and professional activities.

Outcome of the Event:

The Expert Lecture on Intellectual Property Rights (IPR) enhanced students' awareness and understanding of various forms of intellectual property, including patents, copyrights, trademarks, and industrial designs. Students gained knowledge of IPR protection and registration procedures and understood the importance of safeguarding innovative ideas and research outcomes. The session encouraged students to promote innovation, respect intellectual property rights, and apply IPR principles in their academic projects and future professional endeavors.
