

Civil Engineering Department School of Engineering & Technology Academic Year 2025-26 Report on Community Engagement Project (CEP)

1. Event Title: Community Engagement Project, Jategaon Village, Nashik.

2. Event Date: 4.09.2025

3. Event Conduction Duration: 11.00 AM TO 3.00 PM

4. Event Venue: Jategaon Village, Nashik.

5. Event Resource Person Details (Speaker Image, Speaker name, Designation, company name)

Mr. Sakharam Patil Village Police Representative (Police Patil) Jategaon Village, Nashik.

Mr. Balu Mundekar Head of the village council (Sarpanch) Jategaon Village, Nashik.

Headmaster Primary School Jategaon Village, Nashik.

6. Name of Event Coordinator with contact details:

Dr. Amit Kumar - Mo. 9049381383

7. Number of Participants: 89 (students and faculty members)

8. Event Outline, Objective & Outcome of the event:

Outline: The Department of Civil Engineering, School of Engineering and Technology, Sandip University, Nashik, organized a Community Engagement Project (CEP) on September 4, 2025, to study the village's infrastructure and socio-economic conditions. The project included surveys, facility assessments, and interactions with local stakeholders to identify key developmental needs.

Objective:

- 1. To assess the availability and condition of public infrastructure such as roads, drainage, schools, health centres, and water supply.
- 2. To collect demographic and household-level socio-economic data for understanding the community profile.

- 3. To document water sources, storage practices, and related challenges faced by the villagers.
- 4. To engage with local leaders, teachers, and residents through interviews and discussions to identify priority issues in education, health, and resource management.

Outcome of visit: The visit provided a detailed understanding of the village's infrastructure and socio-economic status. The survey highlighted the condition of essential facilities like the Panchayat office, Aanganwadi schools, and health centres. Road and drainage systems were found to require improvement in certain areas, while water scarcity emerged as a major concern. Household surveys revealed variations in income levels, occupations, and educational status, with literacy rates needing attention. Interviews with the Sarpanch and Gram Panchayat members gave insight into governance challenges, while group discussions emphasized the need for better access to health and education. The project created a platform for mutual dialogue between students and villagers with Aanganwadi Teachers for ensuring a peoplecentered approach. The findings will support future planning and sustainable development initiatives in the community.
