

Ganesh Chaturthi at Shree Siddhivinayak School Of Special Children

On October 19, 2023, students at Shree Siddhivinayak School of Special Children celebrated 'Ganesh Chaturthi' with tremendous pomp and excitement. Ganesh Chaturthi commemorates Lord Ganesha's birthday, the son of Lord Shiva and Parvati. Vinayaka Chaturthi or Ganeshotsav are other names for the occasion.

The event began with a customary lamp lighting, followed by a prayer to ask for Lord Ganesha's blessings. The Chairman, Sri A Murali Mukund, praised the pupils' creativity. On this joyous occasion, he offered his best wishes to the pupils and their parents. The cultural program began with a devotional hymn, followed by a play depicting the significance of honoring the eco-friendly celebration. The pupils elaborated on the festival's significance.

During our internship, we Sandip University students decorated the Ganpati with the theme Chandrayaan 3. The Chandrayaan-3, which is India's third lunar mission, was successfully launched on July 14, 2023, from the Satish Dhawan Space Centre (SDSC) located at Sriharikota in Andhra Pradesh. The mission's Vikram Lander successfully made a soft landing on the Moon on August 23, 2023, at 6:04 PM. With this, India has become the fourth country to achieve a soft landing on the Moon,

joining the likes of the United States, the former Soviet Union, and China. India is also the first country to reach the Moon's south pole.

We made the moon out of tissue paper to add texture and realism. We created planets by coloring differently shaped balls. The rocket was constructed from ketchup bottles, while the lander was constructed from a cardboard box. We utilized cotton and LED lights to create the realistic look of clouds. The Chandrayan 3 theme decoration for Ganapati can have a positive impact on special children. It provides a unique and engaging experience for them, sparking their curiosity and imagination. The theme creates a sense of wonder and excitement, allowing them to learn about space exploration in a fun and interactive way. It can also encourage their creativity and inspire them to dream big.
