NOTICE

Date 03/09/2026

Free Thalassemia Screening Camp and Awareness Session on 9th September 2026

All the students of D.Pharmacy, B.Pharmacy and M.Pharmacy programmes of the School of Pharmaceutical Sciences (SOPS) are hereby informed that a **Free Thalassemia Screening Camp** and Awareness session will be organized on **9th September 2026**. The Camp and awareness session is organised in collaboration with **R.S.S Janakalyan Samiti's, Janakalyan Blood Centre, Nashik** and **School of Pharmaceutical Sciences (SOPS), Sandip University, Nashik**.

Thalassemia is an inherited blood disorder that affects the body's ability to produce normal haemoglobin. Haemoglobin is essential for carrying oxygen throughout the body. It occurs due to genetic changes inherited from parents. It can result in the production of reduced or abnormal haemoglobin, leading to **anaemia**.

Major Types: Alpha Thalassemia and Beta Thalassemia

A person may be a **thalassemia carrier (trait/minor)** without having significant symptoms. However, identifying carriers is important, particularly before marriage and family planning.

Why is Thalassemia Screening Important? Thalassemia screening helps to:

- Identify individuals carrying the thalassemia trait.
- Promote awareness about this inherited condition.
- Support informed genetic counselling and family planning.
- Reduce the likelihood of children being born with severe forms of thalassemia.

All students are encouraged to actively participate in this important health awareness and screening initiative. The screening will help in the early identification of thalassemia traits and promote awareness regarding the prevention and management of this genetic blood disorder.

Details of the Programme: Date: 9th September 2026

Programme: Free Thalassemia Screening Camp and Awareness session **Participants:**

All D.Pharmacy, B.Pharmacy and M.Pharmacy Students

Organized for: Students of the School of Pharmaceutical Sciences, Sandip University.

Awareness sessions will be conducted.

All students are requested to cooperate and participate actively in the screening Camp.

Brief description of Event: Free Thalassemia Screening Camp and Awareness session was organized on 9th September 2026. The Camp and awareness session is organised in collaboration with R.S.S Janakalyan Samiti's, Janakalyan Blood Centre, Nashik and School of Pharmaceutical Sciences (SOPS), Sandip University, Nashik. Dr.Sangita Lodha delivered the Awareness Session on Thalassemia. Later the Screening of the Students was carried out by team R.S.S Janakalyan Samiti's, Janakalyan Blood Centre, Nashik under the Guidance of Mr. Pradeep Dhole total 164 students give their blood samples for Thalassemia Screening.

Objective of the Event:

The objective of the Free Thalassemia Screening Camp and Awareness Session was to create awareness among students regarding Thalassemia, its causes, symptoms, prevention, and early diagnosis. The event also aimed to encourage voluntary screening, promote preventive healthcare practices, and educate students about the importance of early detection and informed health decisions.

Outcome of the Event:

The awareness session enhanced students' understanding of Thalassemia, including its causes, symptoms, inheritance, prevention, and the importance of early diagnosis. Students gained valuable knowledge regarding the significance of screening and preventive healthcare. The screening camp encouraged students to become more conscious about their health and adopt responsible approaches towards preventing hereditary blood disorders
