| Mode            | Online Meeting via Google Meet                                                                            |
| Time            | 6:00 PM (Egypt Time) / 8:30 PM (Indian Standard Time)                                                     |
| SOPS            | School of Pharmaceutical Sciences, Sandip University, Nashik                                              |
| Adjunct Faculty | Dr. Omar Mohamed Omar, Head of Medical Research, CXAI Technology, Cyprus                                  |
| Purpose         | Exploration of academic, research, faculty/student exchange and institutional collaboration opportunities |

### 1. Executive Summary

The School of Pharmaceutical Sciences (SOPS), Sandip University, conducted its first online interaction with **Hon. Adjunct Faculty Dr. Omar Mohamed Omar**, Head of Medical Research, CXAI Technology, Cyprus, on 17 July 2026. The meeting focused on identifying meaningful avenues for academic and research collaboration and establishing a framework for future joint activities between the adjunct faculty and SOPS/Sandip University.

**The discussion was constructive and forward-looking.** Dr. Omar Mohamed Omar conveyed a positive response towards collaboration and expressed particular interest in supporting SOPS/Sandip University as a Scientific Advisor to facilitate effective planning and execution of the proposed academic and research activities. He also requested that a formal MOU draft be prepared before initiating structured collaborative activities. Accordingly, the MOU draft is presently under preparation.

### 2. Objectives of the Interaction

- Introduce the School of Pharmaceutical Sciences and establish a professional academic interface with the Hon. Adjunct Faculty.
- Explore mutually beneficial opportunities for research, teaching, academic mobility and institutional collaboration.
- Discuss potential student and faculty exchange opportunities and international academic exposure.
- Explore joint publications, joint conferences, guest lectures and faculty development/training programmes.
- Discuss a suitable framework through an institutional Memorandum of Understanding (MOU) for systematic implementation of collaborative activities.
- Explore the proposed role of Scientific Advisor for SOPS/Sandip University for strengthening research-oriented and scientific initiatives.

## 3. Key Discussion Points

| Area                                                 | Discussion / Proposed Contribution                                                                                                                                                                                                                        |
|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Academic &amp; Research Collaboration</b>         | The participants discussed the scope for collaborative academic and research initiatives that can benefit students, faculty members and the broader university research ecosystem.                                                                        |
| <b>Student Exchange &amp; International Exposure</b> | Possibility of future student exchange/academic exposure activities was discussed, subject to institutional approval and the provisions of the proposed MOU.                                                                                              |
| <b>Faculty Exchange</b>                              | Potential faculty exchange and interaction opportunities were explored to facilitate knowledge sharing, international academic networking and collaborative capacity building.                                                                            |
| <b>Guest Lectures &amp; Expert Sessions</b>          | It was proposed to organize expert guest lectures, technical interactions and thematic sessions by the adjunct faculty for SOPS students and faculty members.                                                                                             |
| <b>Joint Publications</b>                            | The meeting explored opportunities for joint research papers/publications and collaborative research activities in mutually relevant areas.                                                                                                               |
| <b>Joint Conferences / Academic Events</b>           | Possibility of organizing or participating jointly in conferences, seminars, workshops and other academic events was discussed.                                                                                                                           |
| <b>Faculty Training &amp; Capacity Building</b>      | Faculty development/training programmes and focused scientific/technical sessions were identified as potential areas of collaboration.                                                                                                                    |
| <b>Scientific Advisory Role</b>                      | Dr. Omar Mohamed Omar expressed interest in contributing as a Scientific Advisor to SOPS/Sandip University, subject to formal institutional approval and mutually agreed terms, to support scientific planning and execution of collaborative activities. |

## 4. Major Outcomes of the Meeting

- Positive response received from the Hon. Adjunct Faculty towards academic and research collaboration with SOPS/Sandip University.
- The first online interaction was successfully conducted and resulted in a fruitful discussion on multiple areas of possible collaboration.
- Dr. Omar Mohamed Omar requested that an MOU draft be prepared before commencement of structured collaborative activities.
- MOU preparation is currently in progress for internal review and further discussion with the adjunct faculty.
- Dr. Omar Mohamed Omar expressed interest in serving as a Scientific Advisor for SOPS/Sandip University, which may strengthen scientific guidance, research collaboration and implementation of planned activities, subject to formal approval.
- Potential collaboration areas identified include student/faculty exchange, guest lectures, joint publications, joint conferences and faculty training/capacity-building programmes.

## 5. Proposed Action Plan

| Action Item                                                                                    | Responsibility / Coordination            | Status                      |
|------------------------------------------------------------------------------------------------|------------------------------------------|-----------------------------|
| Prepare draft MOU covering identified collaboration domains.                                   | SOPS / Sandip University                 | In Progress                 |
| Share and obtain feedback on the MOU draft from the adjunct faculty.                           | SOPS with Dr. Omar Mohamed Omar          | To be initiated after draft |
| Examine institutional process for appointment/engagement as Scientific Advisor, as applicable. | SOPS / University Administration         | Proposed                    |
| Prepare a calendar of guest lectures, faculty training and expert interactions.                | SOPS + Adjunct Faculty                   | Post-MOU                    |
| Identify prospective joint research/publication themes and academic projects.                  | SOPS Faculty + Adjunct Faculty           | Proposed                    |
| Explore student/faculty exchange and joint academic event possibilities.                       | SOPS International/Academic Coordination | Proposed                    |

## 6. Conclusion

The first online faculty interaction between SOPS, Sandip University and Hon. Adjunct Faculty Dr. Omar Mohamed Omar was productive and strategically significant. **The discussion established a positive foundation for future international academic, research and faculty development collaboration.** The proposed MOU will provide the institutional framework for implementing the identified activities. The expressed interest of Dr. Omar Mohamed Omar to contribute as a Scientific Advisor may further support SOPS/Sandip University in strengthening research linkages, scientific networking and effective execution of future collaborative initiatives, subject to due institutional process and approval.
