**3. Event Venue:** Class Room no 4

**4. Name of Event Coordinator :**

Dr. Makarand S. Gambhire (Dean-SOPS), Dr. Sunita S. Deore SOPS, Dr. Ashok Thulluru and Dr. Ramdas Dolas

**5. Event Outline & Outcome of the Event:**

**Outline of Program:** Sandip University's School of Pharmaceutical Sciences has organized National pollution control day 2023 for all B. Pharmacy and D. Pharmacy students dated on 2<sup>nd</sup> December 2023 at 11:00 AM To 01:00 PM in Class Room no 4. Dr. Ashok Thulluru and Dr. Ramdas Dolas focused on various key points of pollution and the ways to prevent pollution.

## Objectives of Program:

National Pollution Control Day focuses on preventing pollution and raising awareness about the ways we keep exploiting mother nature. This day is observed on 2<sup>nd</sup> December every year in remembrance of the people who passed away in the Bhopal Gas Tragedy, 1984.

The session was conducted with objectives to discuss various points.

- Raising awareness about the increasing air pollution
- Spreading education on how to manage and control industrial disasters
- Make people aware of the significance of pollution acts
- Ways to prevent industrial pollution caused by human negligence

**Output of Program:** Students attended the programme and because of this programme they understand that National Pollution Control Day has a heart-breaking background but the ray of hope still shines through. It serves as a reminder of what human negligence and carelessness does to the environment. India progresses every year when it comes to pollution control with this remarkable day. Although not a national holiday, pollution control is reaching millions of people through school curriculums and social media. In the midst of a pandemic, we can only pray for the loving souls we lost in 1984 and work for a pollution free future. Students got aware about the different laws that help control the pollution.
