Brief Overview of Event

The School of Science, Sandip University, organized the **Alumni Meet 2025** on 15 November 2025 with the objective of reconnecting with former students and strengthening the alumni–institution network. The event brought together alumni from various departments under the School of Science, creating a vibrant platform for interaction, knowledge sharing, and collaboration.

Objectives of the Alumni Meet

- To reconnect alumni with the school and update them about academic progress.
- To provide a platform for alumni to share their career experiences and achievements.
- To encourage alumni involvement in academic and professional development activities such as mentorship, internships, and guest lectures.

- To foster long-term engagement between alumni, faculty, and students.

Session Highlights

The School of Science, Sandip University, successfully organized the Alumni Meet 2025 on 15 November 2025 from 10:00 AM onwards at the School of Science campus, creating a warm and nostalgic environment for former students to reconnect with their alma mater. The event began with a structured registration process where alumni were greeted by faculty members and student volunteers, fostering a welcoming atmosphere.

Following this, the inaugural ceremony commenced with an address by the Dean, who highlighted the significant milestones achieved by the school and emphasized the invaluable role of alumni in contributing to institutional development. Heads of Departments from various disciplines then shared updates on academic advancements, new laboratory facilities, research initiatives, and departmental achievements, giving alumni an overview of the university's continuous progress.

The alumni interaction session was a major highlight, as graduates from different batches and disciplines enthusiastically shared their diverse career experiences in fields such as forensic science, biotechnology, chemistry, environmental science, academia, research labs, and industry. They offered insightful guidance to current students on developing technical competencies, improving communication and analytical skills, and staying updated with evolving trends in science and technology. An open discussion was also conducted where alumni provided meaningful suggestions to strengthen curriculum design, industry exposure, internship opportunities, and practical training modules. Faculty members noted these recommendations to incorporate them into future academic planning.

The meet concluded with a formal vote of thanks, expressing appreciation to all alumni, faculty, staff, and volunteers for their contribution to making the event successful. Overall, the Alumni Meet 2025 proved to be a memorable and productive gathering that not only strengthened the bond between alumni and the institution but also paved the way for future collaborations through guest lectures, mentorship programs, workshops, internships, and professional networking opportunities.
