DEPARTMENT OF CHEMISTRY

REPORT: AWARENESS PROGRAMME ON MILK ADULTERATION

Academic Year: 2026–27

Date: 23.09.2026

Duration: 3 Hours

Time: 10:00 AM to 01:00 PM

Venue: ZP School, Pegalwadi Village

Participants: Students of Department of Chemistry

Event Coordinator: Ms. Akansha Raut

Introduction

Milk is an important component of the daily diet and its quality and purity are essential for maintaining good health. Milk adulteration can affect its nutritional quality and may pose health risks to consumers. To create awareness regarding the purity and quality of milk, the **Department of Chemistry, School of Science, Sandip University, Nashik**, organized an **Awareness Programme on Milk Adulteration** at **ZP School, Pegalwadi Village**, on **23rd September 2026**.

The programme aimed to spread awareness among the students about milk adulteration and the importance of ensuring the purity of milk before consumption.

Objectives of the Programme

- To create awareness about milk adulteration and its impact on health.
- To educate students about the importance of milk purity and quality.
- To develop awareness regarding the possible presence of adulterants in milk.
- To promote scientific awareness and responsible consumer practices.
- To encourage students to understand the importance of food safety in daily life.

Event Highlights and Activities

1. Awareness Session on Milk Adulteration

An awareness session was conducted for the students of ZP School, Pegalwadi. Students from the Department of Chemistry explained the concept of milk adulteration and highlighted the importance of consuming pure and quality milk.

2. Information on Milk Purity

The programme focused on creating awareness regarding the purity of milk and the possible adverse effects associated with adulterated milk. The importance of being aware of the quality of commonly consumed food products was also emphasized.

3. Interaction with School Students

The Chemistry students interacted with the school students and communicated the concepts related to milk adulteration in a simple and understandable manner. The interaction encouraged the school students to develop scientific awareness about food quality and safety.

4. Community Awareness

The programme served as an initiative towards extending scientific knowledge beyond the university campus. The activity helped in strengthening the connection between the Department of Chemistry and the local community through awareness and education.

Learning Outcomes

The programme provided Chemistry students with an opportunity to communicate their subject knowledge with the community. It enhanced their awareness of food safety issues and developed their communication, presentation and social responsibility skills.

Conclusion

The **Awareness Programme on Milk Adulteration** was successfully conducted on **23rd September 2026 at ZP School, Pegalwadi Village**. The programme created awareness among school students regarding milk adulteration, milk purity and the importance of food safety. The initiative provided a meaningful platform for Chemistry students to share their scientific knowledge with the community and contribute towards creating informed and responsible consumers.

The **Department of Chemistry, School of Science, Sandip University, Nashik**, expresses sincere gratitude to the school authorities, students and all participants for their cooperation and active involvement in making the programme successful.
