

Event Activity Report

Academic Year : 2024 - 25

School/Department Name : Department of Biological Sciences

Event Title : National Girls Child Day

Theme : Empowering Girls for A Bright Future

Event Date : 24Th January 2025

Time : 03: 00 PM to 5:00 PM

Duration in Days : One Day

Mode of Conduction : Offline

Level of Program : School Level

Event Coordinator : Dr. Kiran Thakur
Assistant Professor
Department of Biological Sciences

Participants : Under Graduate and Post Graduate Students from
Department of Biological Sciences

Event Overview:

National Girl Child Day, celebrated on January 24 each year, serves as a significant occasion to raise awareness about the various challenges faced by young girls and to highlight the importance of ensuring their rights and opportunities for growth. The event held on this day in School of Science, Department of Biological Sciences brought together students and teachers with a shared goal: to promote gender equality, education, and empowerment for girls across the country.

The event kicked off with an inspiring opening ceremony that was attended by over 200 participants. The speaker also stressed that for a nation to truly progress, it must invest in the well-being and education of girls, ensuring that no child is left behind due to gender or societal barriers.

Following the opening address, the audience was treated to an array of cultural performances by Students, including traditional dances, songs, and a dramatic skit that portrayed the struggles many girls face when trying to access education. These performances not only entertained but also carried powerful messages about gender inequality, child marriage, and the importance of family and community support in overcoming these challenges.

One of the main highlights of the day was the panel discussion. The panel discussed the various obstacles preventing girls from receiving quality education, such as poverty, gender bias, and cultural practices that discourage girls from pursuing academic and professional aspirations. They also presented solutions, including increased community awareness, governmental support, and local initiatives aimed at supporting girls' education and safety.

The event also featured an interactive session where young girls were invited to share their personal stories. Many of the girls spoke candidly about their experiences and dreams for the future. This emotional segment of the event gave them a platform to voice their concerns and ideas about how they can actively contribute to a world where girls are treated as equals, with the same opportunities as their male counterparts.

In addition to the discussions and performances, the event also recognized and celebrated the achievements of young girls who have excelled in various fields such as academics, sports, and community service. The awards ceremony highlighted the resilience, determination, and incredible potential of these girls, sending a powerful message to the audience about the importance of nurturing and empowering every girl to reach her fullest potential.

The day concluded with closing remarks, reiterated the significance of National Girl Child Day and called on all attendees to commit to working toward a more gender-equitable society. A pledge was taken by all present, promising to advocate for the rights of the girl child, support her education, and ensure her safety and well-being.

Overall, the National Girl Child Day event was an inspiring and impactful celebration of young girls' strength, dreams, and potential. The discussions, performances, and recognition helped shed light on the need for continuous efforts to combat gender inequality and to ensure that girls everywhere are given equal opportunities to succeed. As we move forward, it is essential that we continue these conversations, create supportive environments, and actively work toward empowering girls in every sphere of life.

This event was a reminder of the vital role we all play in creating a world where girls can thrive and realize their dreams without discrimination or hindrance.
