Welcome Address by Program Chair Prof. Sayeeda Tabassum, **Sandip University, Sijoul, Bihar**

Presentations on 14th October 2023(1st Half)

Round-I

Technical Session:1

PPT Presentation by Program Chair **Prof. Sayeeda Tabassum**

Round- II

- Debate on Online Class vs. Offline Class

About the programme:

Organised programmes, particularly those involving interviews, are traditionally analysed based on the content of the conversation. Each statement is often attributed to individual speakers, considering it an independent reflection of their thoughts. In contrast, the realm of online classes has emerged, allowing teachers to educate students through virtual classrooms. Students can access learning materials from anywhere with an internet connection. While online classes offer various learning tools, offline classes provide a practical environment within physical classrooms, facilitating interactive discussions and engagement in recreational activities.

Objectives of the Seminar:

The seminar aims to raise awareness among the faculty and students of the School of Commerce and Management about the distinctions between online and offline classes.

- **Flexibility to Manage Time:** Online classes offer the flexibility for students to attend classes according to their comfort, whether it be at a study table, on a bed, or on a couch.

- **Becoming a Lifelong Learner:** Online learning is designed to spark students' curiosity, encouraging them to become lifelong learners with a continuous interest in acquiring knowledge.
- **Financial Affordability:** Online classes are cost-effective, saving students from expenses related to school uniforms, transportation, and other paid activities.

Conclusion:

While online classes provide education at home with the benefit of flexibility, there is a minimal level of interaction between students and tutors compared to offline learning, where individual attention is more pronounced. Online classes prove to be less expensive due to the elimination of costs associated with study materials, uniforms, and transportation. The programme, led by Prof. Sayeeda Tabassum on October 14, 2023, from 10 a.m. to noon, witnessed active participation from students.

In summarising, the seminar sheds light on the advantages and distinctions between online and offline classes, recognising the merits and considerations associated with each mode of learning. The evolving landscape of education continues to offer diverse opportunities for students, emphasising the importance of adaptability and informed decision-making.

The DAY 14TH October 2023
